Dear Mr Blake,

Re: Congestion Information Resource Guidelines – Draft Determination Report

The National Generators Forum (NGF) appreciates this opportunity to provide a submission to the Australian Energy Market Operator's (AEMO) Congestion Information Resource (CIR) consultation. The NGF supports the creation and ongoing development of the CIR as it provides an important source of information for generator's to manage their financial and trading risks associated with network congestion.

The Draft Determination Report takes account of and responds to previous NGF comments. AEMO's proposed response on these material matters improves and strengthens the value and usefulness of the CIR for market participants.

The NGF looks forward to ongoing engagement with AEMO to identify future areas of improvement for the CIR and to inform the Dispatch and Pricing Reference Group's "prioritisation" process for such projects.

Should you wish to discuss any aspect of this submission, please contact Con Noutso on 03 8628 1240.

Kind regards,

Malcolm Roberts
Executive Director
